FORM ESP100
SUPPLEMENTAL FORM FOR EXISTING STATIONARY INTERNAL COMBUSTION ENGINES

INSTRUCTIONS:

Include all non-portable internal combustion engines such as deep-well pumps, generators, compressors, etc. Do not include engines used to propel vehicles or implements of husbandry.

Rated Horsepower: Rated horsepower is the rated brake horsepower of the engine itself, not of the auxiliary equipment being driven by the engine.

Fuel Type: The engine's primary fuel (e.g. diesel, gasoline, natural gas, LPG.) For gaseous fuels, specify whether it is a lean-burn or a rich-burn engine.

Engine's Use: Use one of the following codes: **DDP** = Direct-driven deep-well pump **EGP** = Electrical generator – prime power **BP** = Booster Pump
GDP = Generator-driven deep-well pump **EGS** = Electrical generator – emergency standby **OTHER** = Other (describe)

Maximum Hours of Operation: The maximum number of hours you expect to operate each engine (you may be limited to the number of hours you specify so do not underestimate your maximum usage)

MANUFACTURER	MODEL NO.	SERIAL NO.	DATE INSTALLED	RATED HORSEPOWER	FUEL TYPE	ENGINE'S USE	MAX HOURS OF OPERATION (HR/YR)
