

South Sacramento –Florin Community Air Protection Steering Committee Meeting

Location: Mack Road Partnership
75 Quinta Court, Suite D, Sacramento, CA 95823
February 26, 2019

Steering Committee Meeting Goals

- 1) Determine final community boundary
- 2) Prioritize air quality concerns
- 3) Develop general monitoring objectives

Agenda

6:30 – 6:35	Welcome
6:35 – 6:45	Guest Speaker
6:45 – 6:50	Approve the meeting notes and charter
6:50 – 7:00	Final discussion on community boundary
7:00 – 7:20	Importance of air monitoring
7:20 – 7:50	Discuss and prioritize air quality concerns
7:50 – 7:55	Public comment on air quality concerns
7:55 – 8:20	Discuss general air monitoring objectives
8:20 – 8:30	Public Comments
8:30	Adjourn

Guest Speaker:

Johnathan London, PH.D.

Associate Professor and Vice Chair: Human
Ecology/Community and Regional Development
Faculty Director: Center for Regional Change
UC Davis

Approval of Meeting Notes From Last Meeting

Approval of Steering Committee Charter

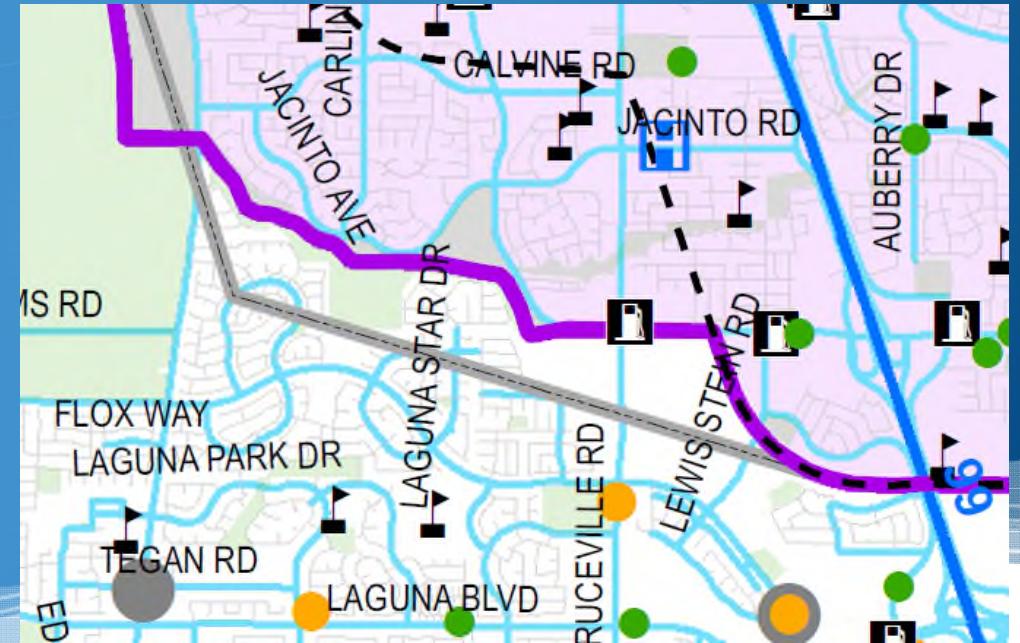

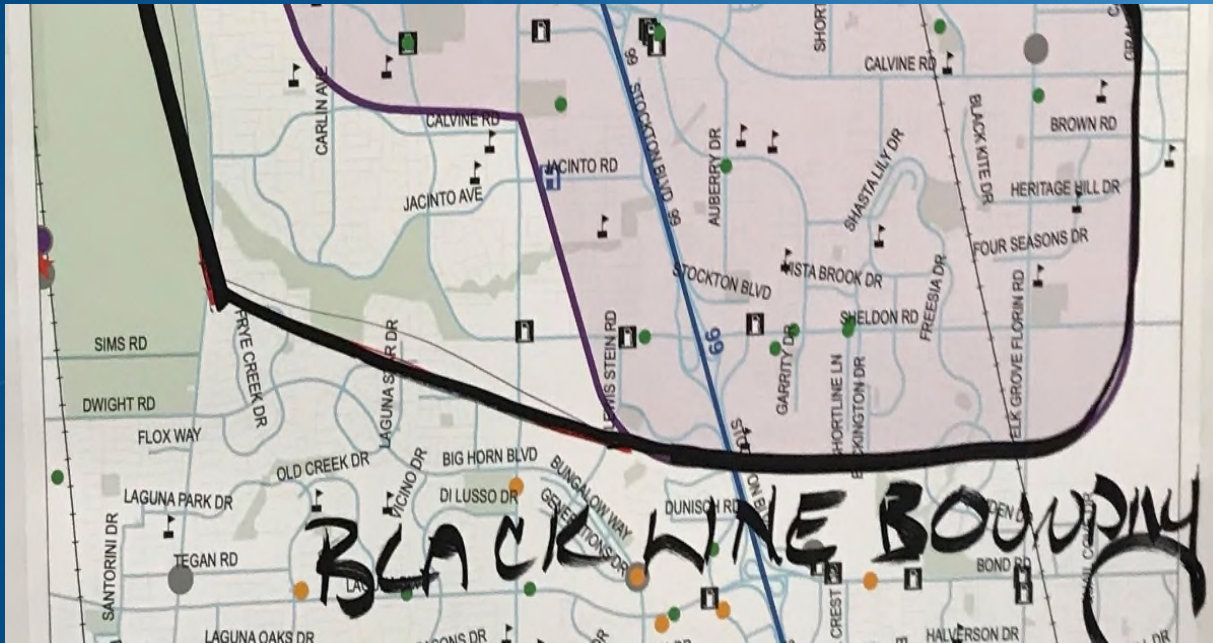

Proposed changes (on Page 3)

To remove a steering committee member and his/her alternate, the District will notify the Steering Committee member and his/her alternate in writing via U.S. mail. The written notice must state that they will be removed from the committee if they do not participate in the next meeting and include the date, time and location of the next meeting. If the member or his/her alternate does not show up at the next meeting, the District will present its intent to remove the member and his/her alternate to the steering committee and ask the steering committee to approve the removal of that member and his/her alternate. The District, in good faith effort, will try and find a replacement for that steering committee member.

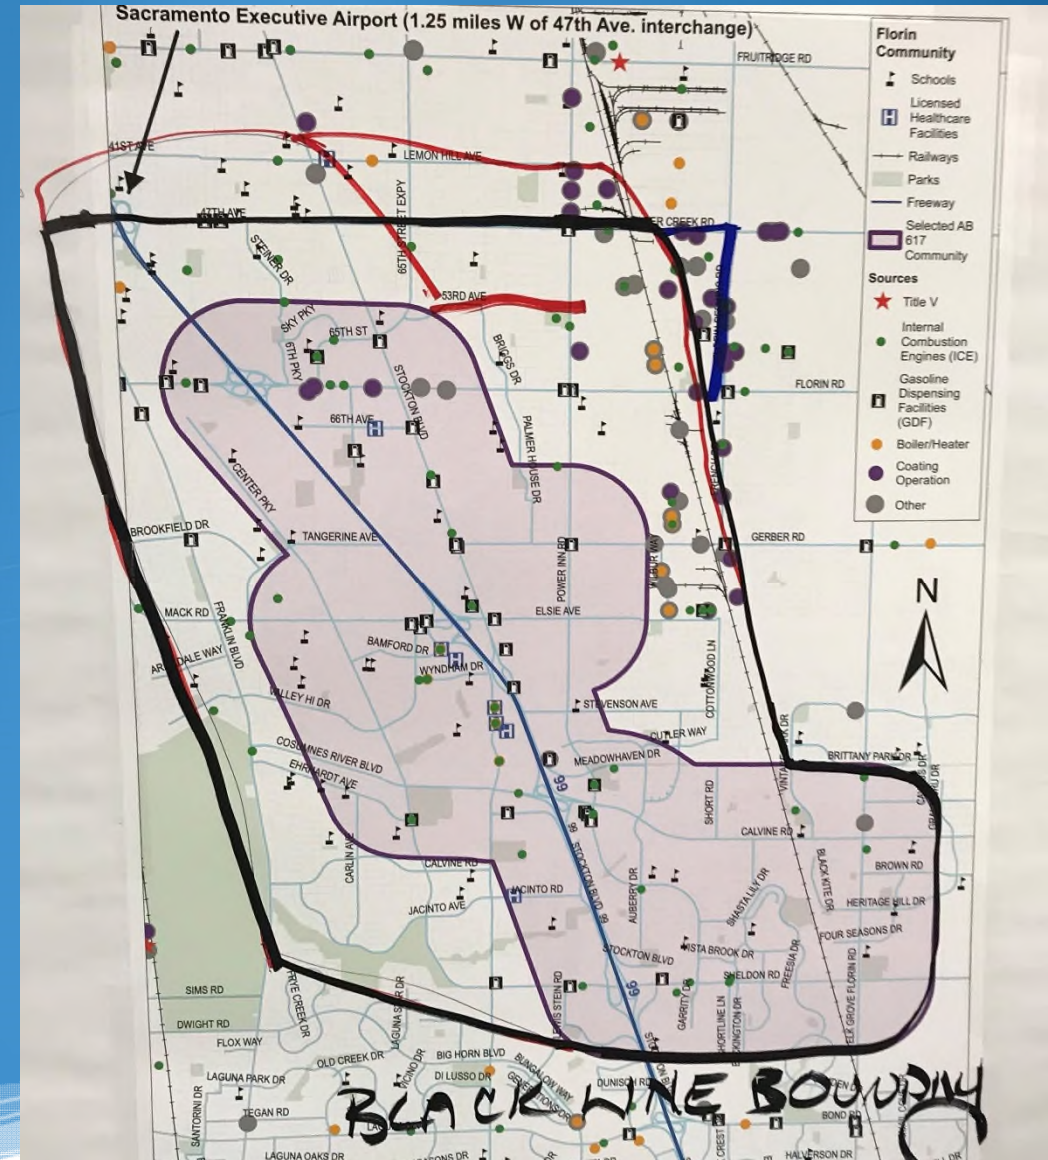

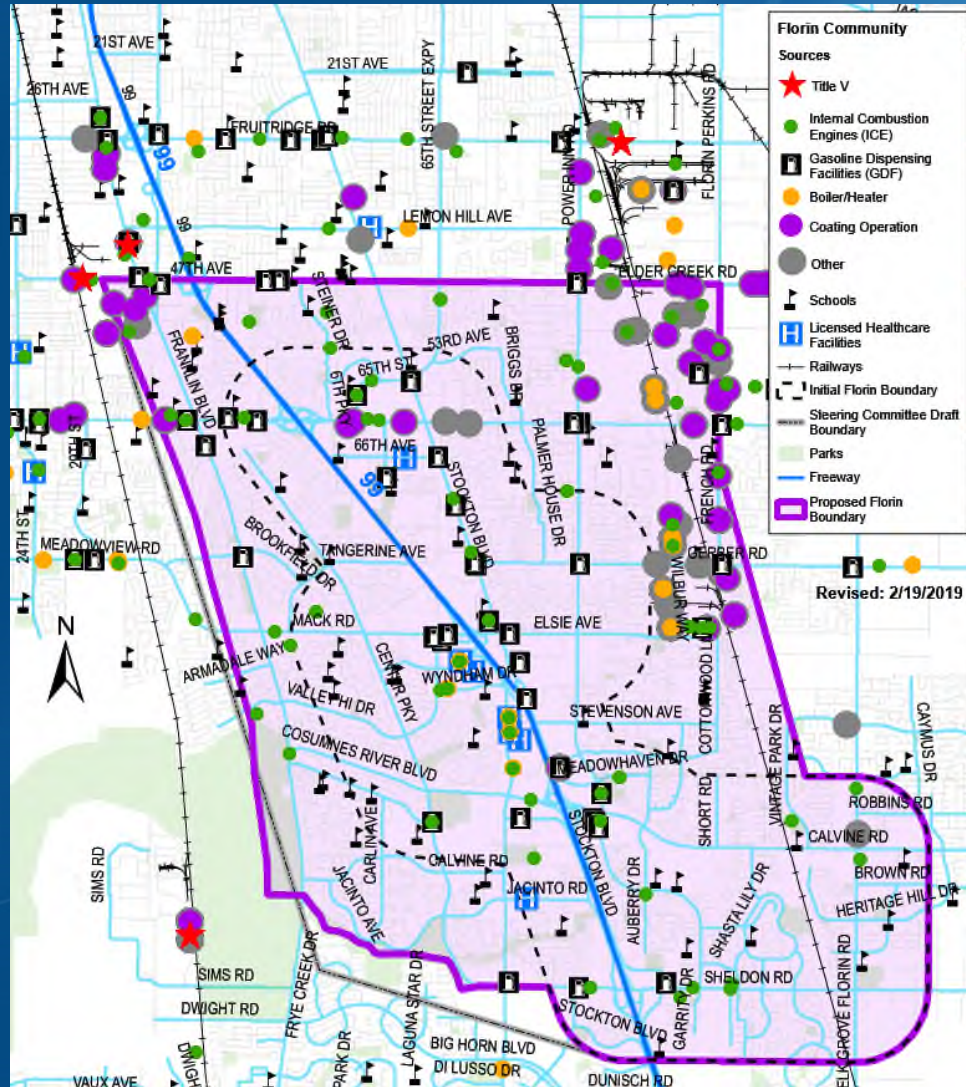

Final Discussion to Community Boundary

Community Boundary Discussion: Southwest Corner

- Follows boundary of census tracts
- Natural separation
 - North Laguna Creek Wildlife Area and Laguna Creek

Community Boundary Discussion

Importance of Air Monitoring (Presentation)

Discuss and prioritize air quality
concerns

Discuss and Prioritize Air Quality Concerns

- Steering Committee discuss with your neighbor regarding your air quality concerns (10 min)
 - Write concerns on sheet of paper
- Post Air Quality Concerns
- Public comments on air quality concerns (5 min)
- Prioritize air quality concerns (10 min)
 - Individually identify top concerns – stickers
- Summarize concerns

Discuss general air monitoring
objectives

Examples of Objectives

Wood Smoke Study:

- Determine impact of wood smoke in EJ versus non-EJ communities
- Differentiate between traffic emissions and wood smoke

Other Examples:

- Determine air quality impact of idling of school buses at schools
- Provide real time community scale air quality information to residents to increase air quality awareness
- Determine the sources of PM concentrations in the community (How much is from stationary sources vs. mobile)
- Determine air quality impact from traffic at major intersections in the community

Public Comments
