

Recommended Construction Mitigation Language Conference Call for Lead Agencies

The Air District staff invites lead agencies to participate in a conference call to hear about potential changes to the Recommended Construction Mitigation Language and to provide feedback.

The current recommended construction mitigation language has been in place in Sacramento County since the late 1990s. Air District staff recently conducted a review of the construction mitigation program and has concluded that a change to the mitigation language is needed.

The standard mitigation language and the review document are available at the following website:

<http://www.airquality.org/businesses/ceqa-land-use-planning/mitigation>

Conference call details:

April 19, 2018 @ 9 a.m.
Conference call number: 1-866-448-6760
Participant Code: 431623

Questions on the Construction Mitigation Program can be directed to Karen Huss at 916-874-4881 or khuss@airquality.org.
