

Introductory Launch of Sacramento's

CLEAN CARS 4 ALL

SACRAMENTO METROPOLITAN

AIR QUALITY
MANAGEMENT DISTRICT

⚡ **The Sac Metro Air District is deploying Clean Cars 4 All (CC4A).** This is a traditional vehicle **“Scrap & Replace”** grant program designed for lower income participants, with one unique element – an Alternative Transportation Option (ATO). Similar programs are currently available in the San Joaquin Valley, South Coast Air Basin and the San Francisco Bay Area.

⚡ **The Sacramento program has two components: “Scrap & Replace,”** which offers grants up to **\$9,500** applied towards the purchase of a new or nearly new zero or near zero emission replacement vehicle and up to **\$2,000** for the purchase and installation of an electric vehicle charging system.

⚡ The program includes a second choice for participants to **“Scrap & Forget.”** This ATO allows the participant to opt out of receiving a replacement vehicle, and instead receive up to **\$7,500** to access public, private, and shared mobility options.

⚡ The **“Scrap & Forget”** option is an important **mobility innovation** coming to Sacramento. It is meant to take advantage of the many mobility options in the region. These include micro-transit on demand, car and bike sharing, Uber and Lyft, as well as public transit options.

⚡ To participate in either option, an older vehicle will need to be turned in for scrap.

⚡ The grant offered through this program does not require repayment. A personal car loan can be matched with the grant funds to complete the vehicle purchase.

⚡ In addition to this grant, additional financial incentives may be available for the purchase of new plug-in replacement vehicles and related electric charging infrastructure.

PROGRAM TIMELINE

● **Soft launch**
4th quarter 2019

● **Full deployment**
1st quarter 2020

A Sac Metro Air District Program

CLEAN AIR AND CLIMATE RELEVANCE

- ⚡ The Sac Metro Air District, as a partner with the state of California, is excited to add this mobility program to the long list of other innovations emerging in the region.
- Transportation emissions, congestion, and a growing trend of single-occupant vehicle use are increasing greenhouse gas emissions and making it more challenging to meet clean air and climate change goals.
- ⚡ With programs like **Clean Cars 4 All**, we can imagine a future less dependent on combustion vehicles for our transportation needs.
- ⚡ This program is an example of the transformation of transportation taking place locally and across many regions in the state, the nation, and the world.
- We in Sacramento want to be the game changers for future mobility.

CLEAN CARS 4 ALL

- ✔ Application review and processing
- ✔ Financial awareness and budgeting support
- ✔ Vehicle evaluation and selection
- ✔ Lender selection and loan application processing

PARTICIPANTS MUST MEET THE FOLLOWING CRITERIA

- ⚡ Possess a current California Driver License.
- Reside within Sacramento County (later to be expanded to Sacramento region).
- ⚡ Be at or below the 400% federal low-income criteria (for a family of four this income is less than \$103,000 per year).
- ⚡ Own a working vehicle that is 15 years old or older (2004 or older).
- Be willing to relinquish their older vehicle for scrappage and accept a replacement of a new or nearly new plug-in electric vehicle or accept the Alternative Transportation Option.
- For vehicle replacements, accept assistance for installation of charging infrastructure at their residence for the replacement plug-in vehicle or simply use the public charging network.

ASSISTANCE INCLUDES

- ✔ Replacement vehicle purchasing
- ✔ Assistance with older vehicle disposition
- ✔ Workforce development opportunities

PROGRAM FUNDING

\$5 million from California Climate Investments administered by the California Air Resources Board. The funding is expected to fund 300 to 500 vehicles and about 100 alternative transportation (VISA card) options.
