DEFINITIONS

BUILDER: Any individual or company that constructs and/or sells any residential or commercial, single or multi-building unit with a wood burning appliance.

COATING: A material which is applied to a surface and which forms a film in order to beautify and/or protect such surface.

COOKSTOVE: Any wood fired appliance used primarily for cooking food as described in Title 40 of the Code of Federal Regulations (CFR) Section 60.531.

FIREPLACE: Any permanently installed masonry or factory built device designed to operate with an air-to-fuel ratio greater than or equal to 35-to-1, a burn rate over 11 pounds per hour, or a weight over 1760 pounds.

GARBAGE: Any solid, semisolid, or liquid wastes generated from residential, commercial, and industrial sources, including trash, refuse, rubbish, industrial wastes, asphaltic products, manure, vegetable or animal solid or semisolid wastes, and other discarded solid or semisolid wastes.

MANUFACTURER: Any person who constructs or imports a wood burning appliance.

MASONRY HEATER: Any permanently installed device that meets the definition of a masonry heater in ASTM E 1602-03.
PAINTS: Any exterior and interior house and trim paints, enamels, varnishes, lacquers, stains, primers, sealers, undercoaters, roof coatings, wood preservatives, shellacs, and other paints or paint-like products.

PAINT SOLVENTS: Any organic solvents sold or used to thin paints or to clean up painting equipment.

PELLET-FUELED WOOD BURNING HEATER: Any wood burning heater which is operated on pellet-fuel, and is either U.S. EPA Phase II certified, or exempted under U.S. EPA requirements set forth in Title 40 CFR, Part 60, Subpart AAA.

PERMANENTLY INOPERABLE: Modified in such a way that a device can no longer operate as a wood burning appliance.

PERMANENTLY INSTALLED: Built or installed in such a manner that the device is attached to the ground, floor, or wall, and is not readily movable. A free standing stove that is attached to an exhaust system that is built into or through a wall is considered permanently installed.

RETAILER: Any person engaged in the sale of wood burning appliances directly to the consumer.

SEASONED WOOD: Wood of any species that has been sufficiently dried so as to contain 20 percent or less moisture by weight.

SOLID FUEL: Any wood, non-gaseous, or non-liquid fuel.

SOLVENT: Any liquid containing a volatile organic compound or combination of volatile organic compounds, which is used to perform cleaning or thinning of paints or coatings.

TREATED WOOD: Wood of any species that has been chemically impregnated, painted, coated, or similarly modified to improve resistance to insects or weathering.

U.S. EPA: The United States Environmental Protection Agency.

U.S. EPA PHASE II CERTIFIED: Any appliance certified by the U.S. EPA to meet the performance and emission standards set forth in Title 40 CFR, Part 60, Subpart AAA.

VOLATILE ORGANIC COMPOUND: For the purposes of this rule, “volatile organic compound” has the same meaning as in Rule 101- GENERAL PROVISIONS AND DEFINITIONS.

WASTE PETROLEUM PRODUCT: Any petroleum product, other than gaseous fuels, that:

1. has been refined from crude oil, and
2. has been used, and
3. has been contaminated with physical or chemical impurities as a result of use.

WOOD BURNING APPLIANCE: Any fireplace, wood burning heater, or pellet-fueled wood heater, or any similar enclosed, permanently installed, indoor or outdoor device burning any solid fuel used for aesthetic or space-heating purposes, which has a heat input of less than one million British thermal units per hour (Btu/hr).

WOOD BURNING HEATER: An enclosed, wood burning appliance capable of, and intended for space heating as described in Title 40 CFR Section 60.531 (i.e., wood stove or fireplace insert).
SALE AND INSTALLATION OF WOOD BURNING APPLIANCES:

301.1 Effective (One year after adoption date), no person shall sell, offer for sale, supply, install, or transfer a new wood burning appliance unless it is one of the following:
