Exemption from permitting requirements as specified in District Rule 201, General Permitting Requirements, is determined by the maximum actual usage of coating and solvent materials. Please record in the table below the **MAXIMUM ACTUAL** daily usage of coatings and solvents (all types) for any one day you work. Be advised that if the usage of coatings and solvents at your facility exceeds 1 gallon in any single day after claiming a permit exemption, you will be in violation of District Rule 201 and may be subject to penalties. **Exemption status does not provide relief from the specific requirements (VOC standards, work practices, recordkeeping) found in other District rules to which your facility may be subject.**

Material	Maximum Actual Daily Usage	Is total greater than 1 gal/day?	
		YES: OBTAIN PERMIT TO OPERATE	NO: EXEMPT FROM OBTAINING PERMIT TO OPERATE*
Coatings	_____ gal/day		
Solvents/Strippers	_____ gal/day		
TOTAL USAGE	_____ gal/day		

* If any coatings used contain hexavalent chrome, you are not exempt from obtaining a Permit to Operate and should notify the District.

If your answer in the table above is "YES", complete an Authority to Construct/Permit to Operate application package and submit it with the appropriate fees to the District. If your answer in the table above is "NO", complete the remainder of this form and submit it to the District.
