

SOUTH SACRAMENTO- FLORIN CERP FAQs

WHAT IS THE COMMUNITY EMISSIONS REDUCTION PLAN (CERP)?

The plan is a guide to lower air pollution and protect people's health in South Sacramento–Florin. This plan focuses on local pollution sources and actions so that we can improve the air quality.

WHY IS SOUTH SACRAMENTO–FLORIN PART OF THIS PROGRAM?

The State selected the region as part of California's Community Air Protection Program (CAPP) in 2018. In 2024, the region was approved to create a Community Emissions Reduction Plan.

WHO HELPED CREATE THE PLAN?

The Community Steering Committee (CSC) created the goals and strategies in the plan. The Air District helped turn the plan into clear goals and actions. Current CSC members are listed at www.AirQuality.org/CAP

WHAT TYPES OF STRATEGIES ARE IN THE DRAFT PLAN?

The plan includes 28 strategies to reduce emissions and exposure to air pollution in four categories: Urban Planning and Mobile, Residential, Commercial, and Outreach.

Steering Committee members share CERP information with residents at the Sweet Potato Festival on March 22, 2025.

HOW WAS COMMUNITY INPUT USED?

The CSC and its subcommittees led the CERP development by:

- Sharing information about the program and collecting feedback from the community
- Identifying the air quality issues that matter most to residents
- Setting goals to reduce air pollution and exposure in the community
- Choosing actions to help reduce pollution and protect health
- Deciding how progress will be tracked and when actions will be carried out
- Clarifying who is responsible for putting the plan into action

Explore an interactive summary of the CERP and strategies in the Air District's Story Map at: bit.ly/4qun9uw

Residents share ideas at The Air We Share event on October 15, 2025 to help decide which CERP outreach projects should be funded.

WHAT OUTREACH WAS DONE DURING PLAN DEVELOPMENT?

We held monthly bilingual meetings, online meetings, and community events with information in multiple languages. This included The Air We Share event on October 15, 2025.

IS THE PLAN FINAL?

No. The plan is a draft and is open for public comment. Feedback will be used to revise the plan before it is finalized.

HOW CAN I REVIEW THE PLAN AND SHARE COMMENTS?

The draft plan is available at www.AirQuality.org/CAP. You can read the plan, submit comments, and register for the CERP workshop on January 31.

WHAT HAPPENS AFTER THE PUBLIC COMMENT PERIOD?

- We will review all comments and update the plan if needed.
- We will share the plan for a final round of public comments.
- After that, the District's Board will vote on whether to approve the plan.
- Once approved, the plan will be submitted to the California Air Resources Board.

WHEN WILL THE PLAN BE IMPLEMENTED, AND PROJECT DETAILS BE AVAILABLE?

The implementation period will be carried out over six years, from 2026 through 2031. Implementation depends on approval from the California Air Resources Board.

HOW WILL PROJECTS BE FUNDED?

Implementing all 28 strategies depends on how much funding and staff time the Air District has. Four early action strategies are already underway. With current funding, the Air District plans to carry out these four strategies and 10 additional top-priority strategies.

Each year, the State Legislature decides how much funding is available. If more funding is provided, the Air District will continue working with the CSC to move forward with the next priority strategies.

HOW CAN I GET INVOLVED?

You can get involved by attending monthly meetings and community events. If you live or work in the South Sacramento–Florin area, you can also apply to join the CSC. The application is available at www.AirQuality.org/CAP.
