

# Community Air Protection in Sacramento

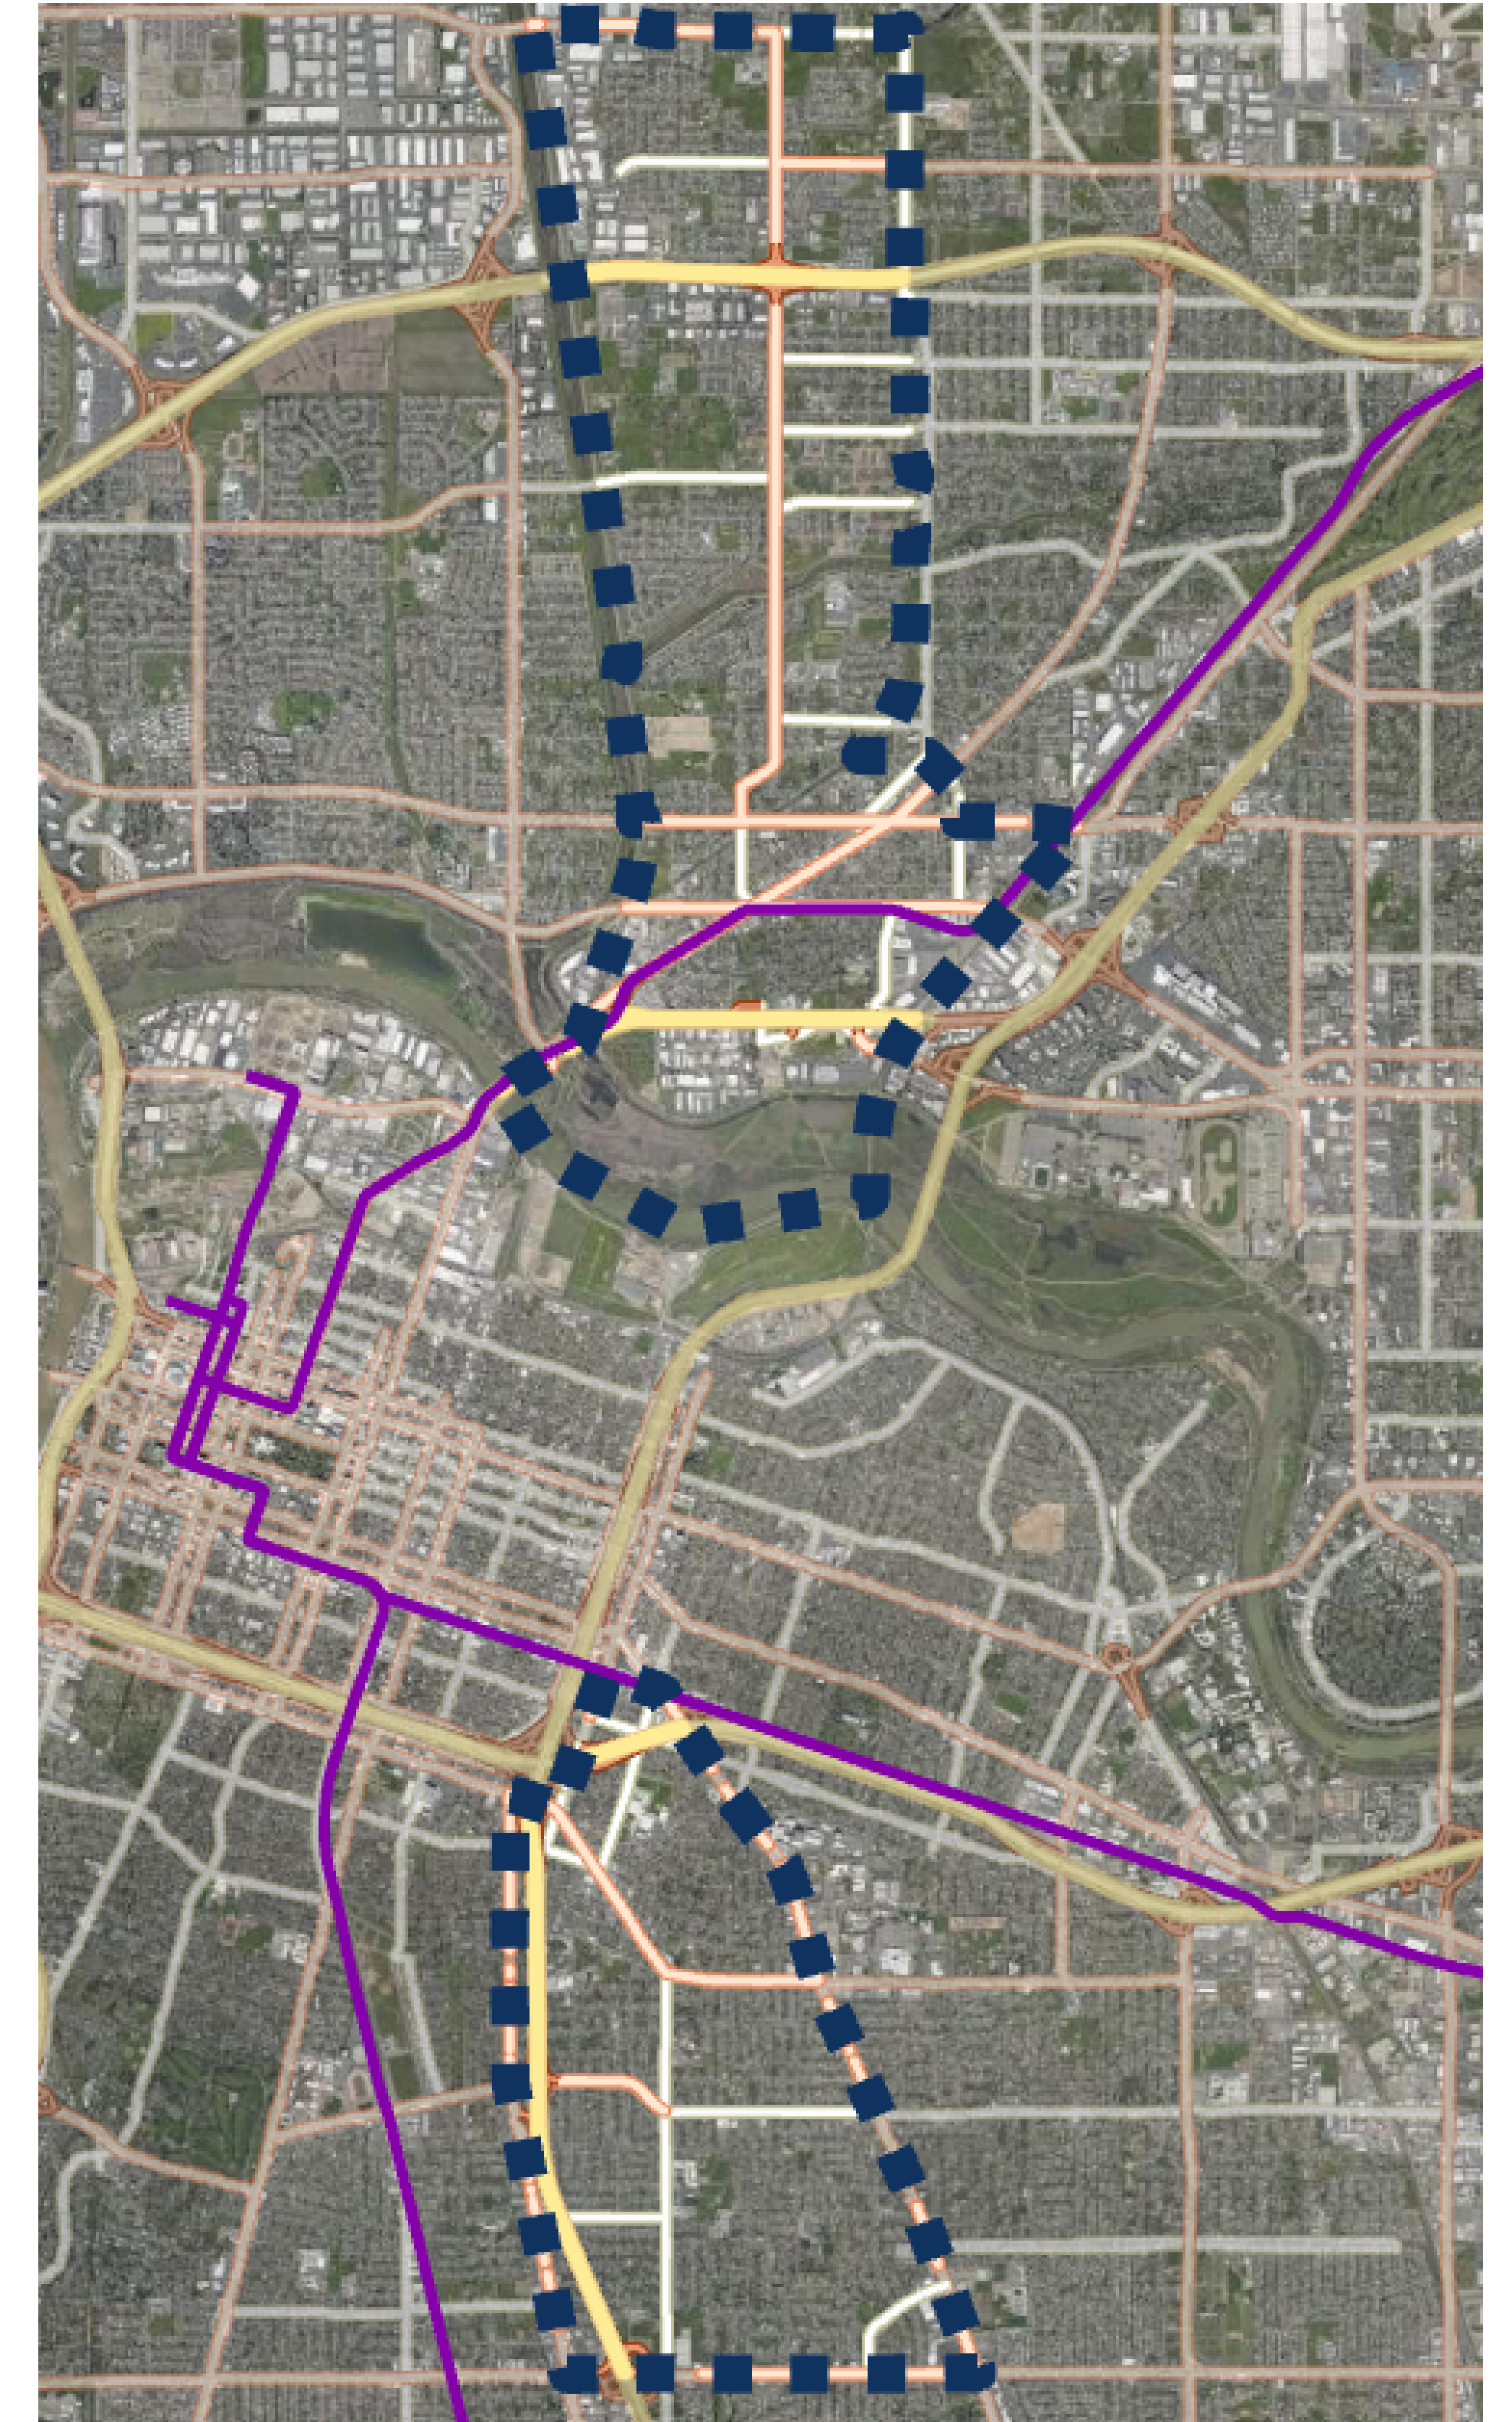

Sacramento suffers from serious air quality and public health challenges. A new program is helping communities monitor their air quality and take action to advance environmental justice block by block.

## A Focus On Neighborhood Air Quality in Two Communities

In 2017, **Assembly Bill 617** was signed into law, which created the Community Air Protection Program run by the California Air Resources Board (CARB).

The **Community Air Protection Program** empowers California's most polluted communities to monitor their air quality and guide investments to reduce harmful emissions and improve public health in frontline neighborhoods.

Through this program, CARB has awarded a **two-year Community Air Grant** to a group of local nonprofit organizations - *Valley Vision*, *WALKSacramento*, *Breathe CA Sacramento Region*, and *Green Tech Education* - to help the **Old North Sacramento/Norwood** and **Oak Park** neighborhoods monitor their air, understand how air quality impacts health, and develop a plan to reduce exposure to air pollution.

## Project Milestones:

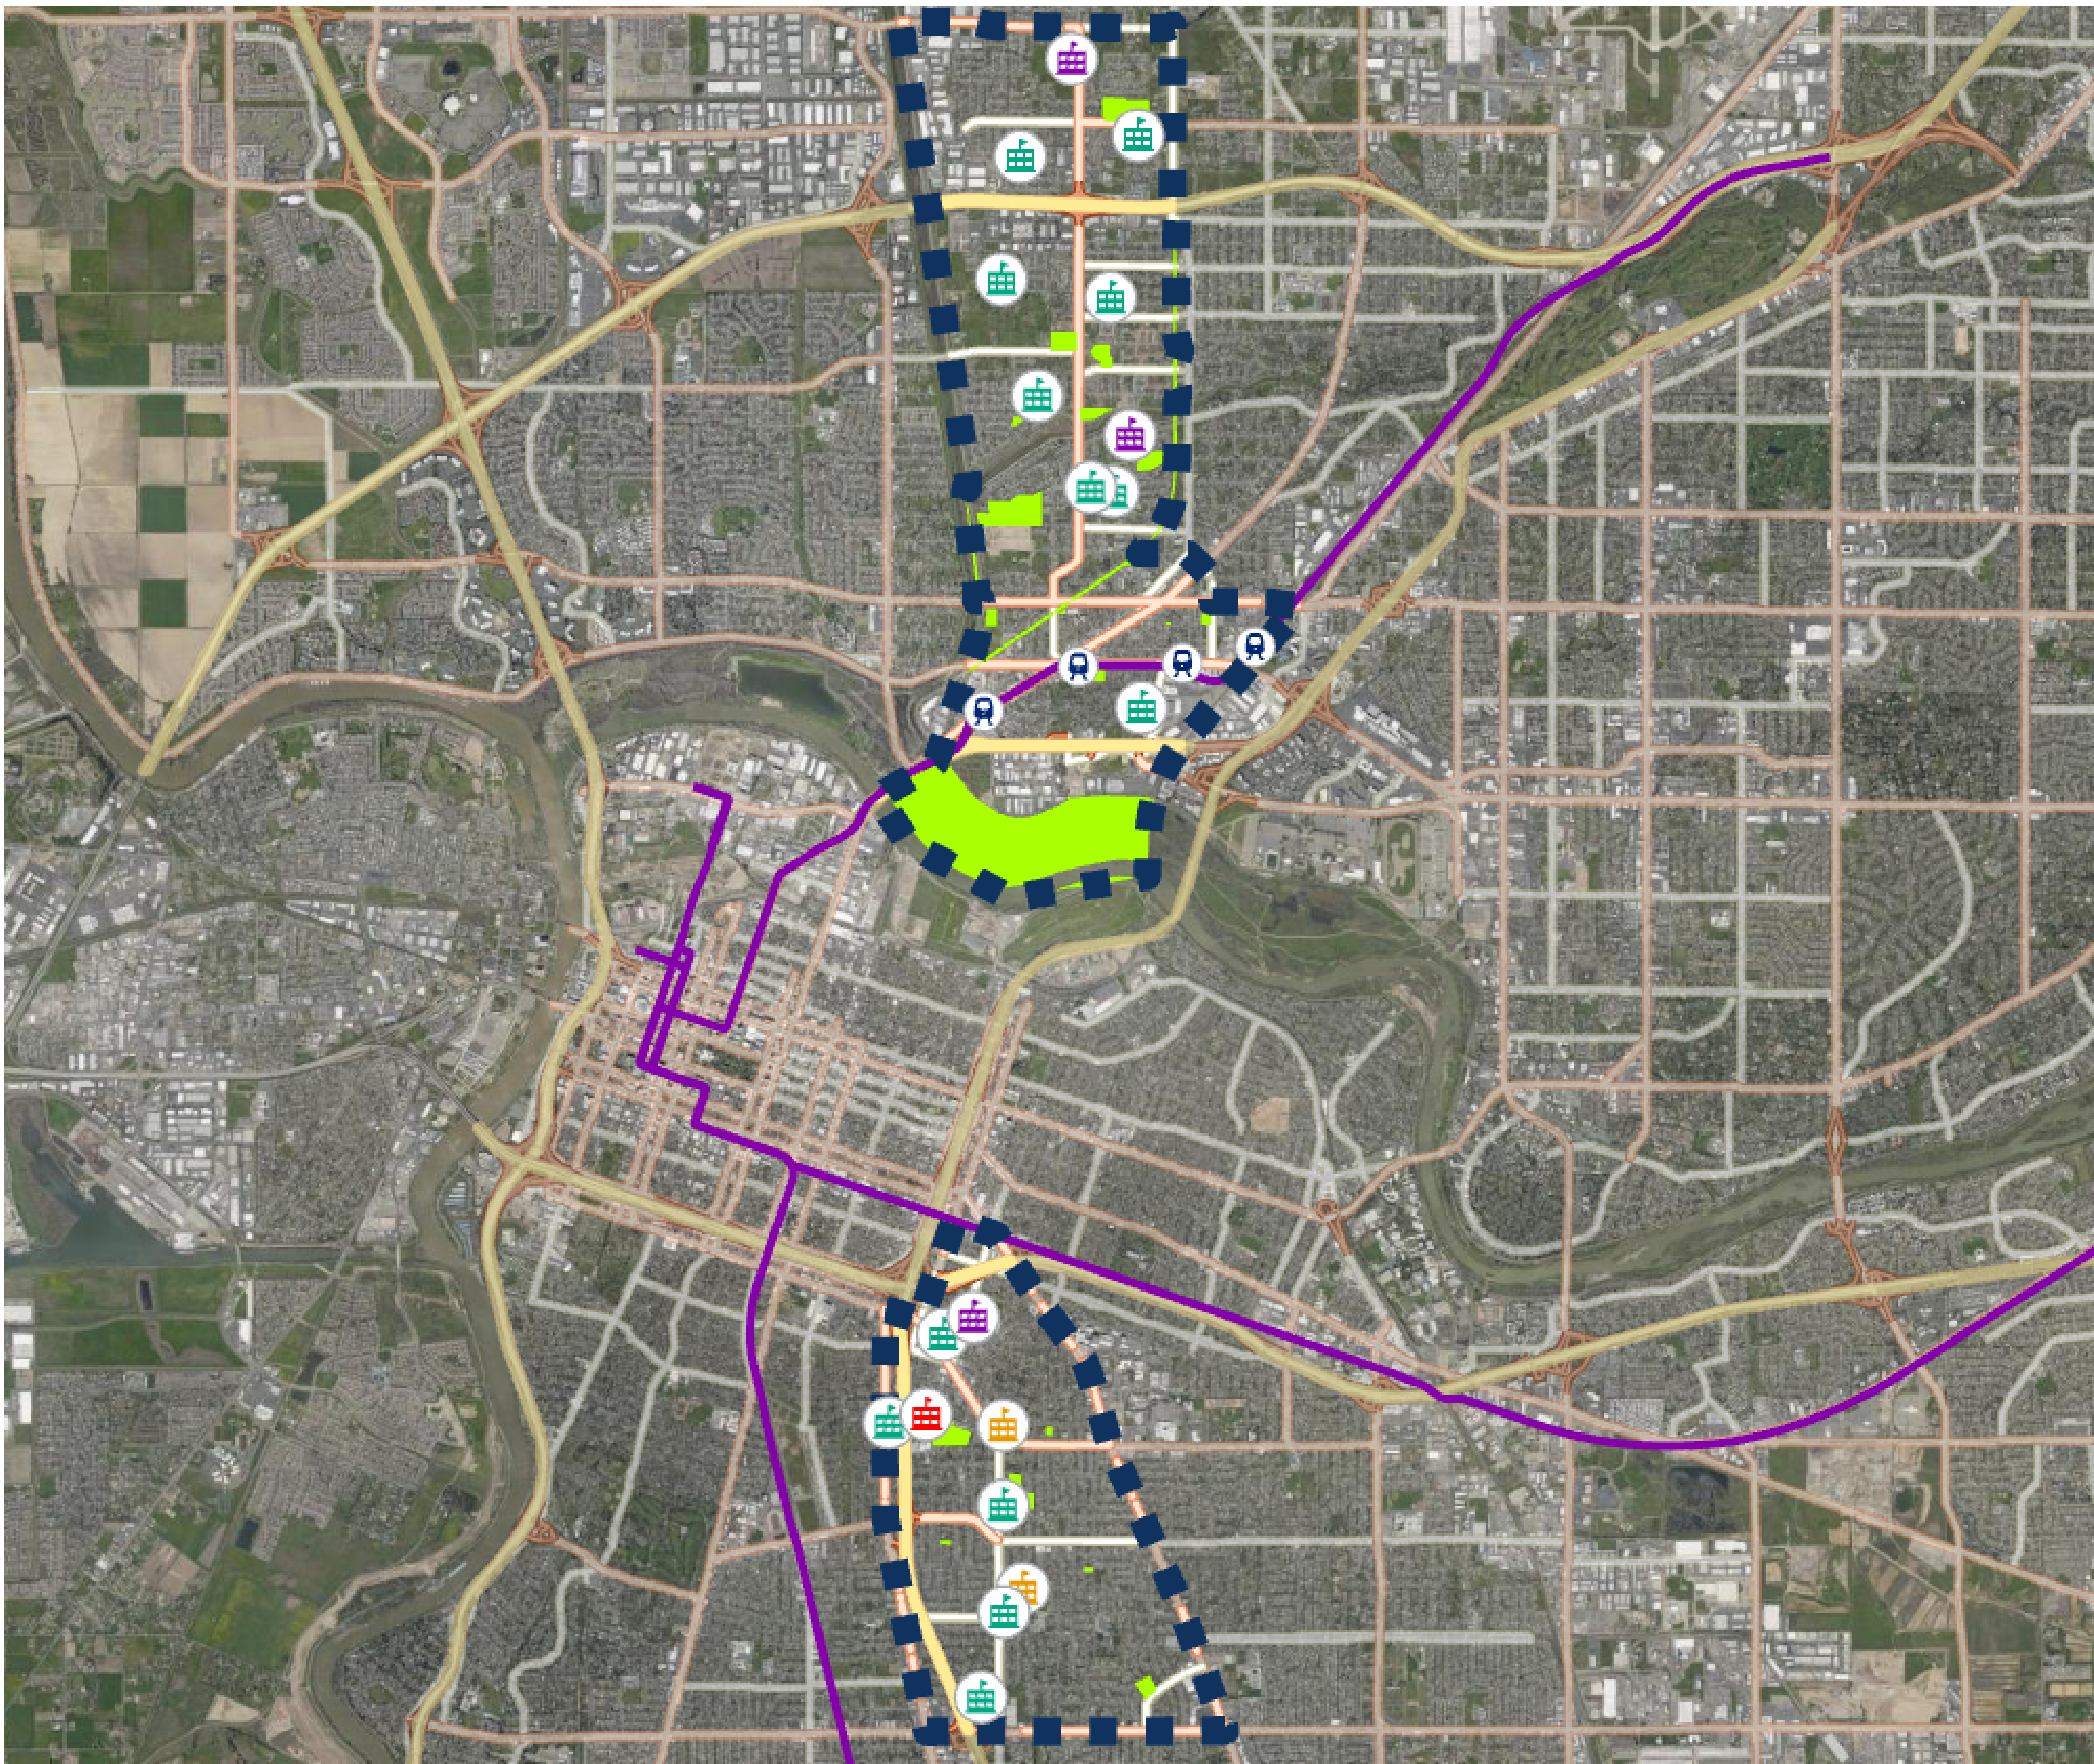

'Sacramento Neighborhoods Activating on Air Quality' (SNAAQ) is part of California Climate Investments, a statewide initiative that puts billions of Cap-and-Trade dollars to work reducing greenhouse gas emissions, strengthening the economy, and improving public health and the environment — particularly in disadvantaged communities.

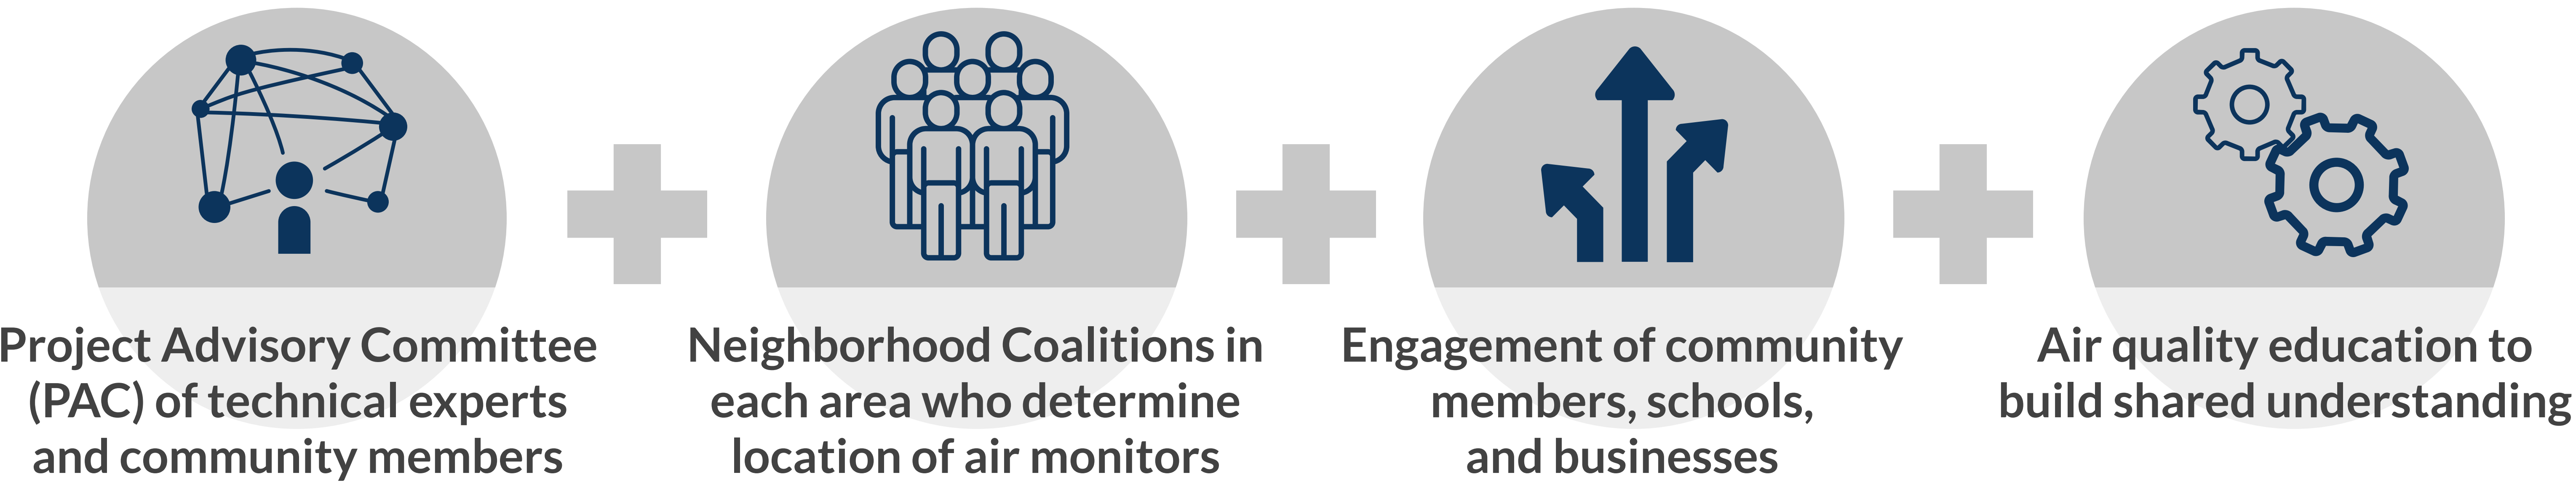

Map of Project Neighborhoods: Old North Sacramento/Norwood and Oak Park

**North Sacramento:** Bordered by Main Avenue in the North, Rio Linda Blvd and rail lines in the East, the American River in the South, and rail lines in the West.  
**Oak Park:** Bordered by R Street in the North, Stockton Blvd in the East, Fruitridge Blvd in the South, and Franklin Blvd and Alhambra Blvd in the West.

A Community-Driven Process
