

Annual Reporting Permit Condition and New Report Submittal Date

On December 15, 2021, the Sacramento Metropolitan Air Quality District notified all active permit holders that a new permit condition had been applied to all permits that require permit holders to submit an Annual Report. The information in the Annual Report supports local, state, and federal emission reporting mandates.

Beginning in 2025, the annual reporting due date is changing from January 31 to March 15. The revised permit condition with the new reporting deadline will only be added to new permits and existing permits that are modified. Otherwise, existing permits will not be retroactively updated.

A copy of the Permit to Operate, including this additional annual reporting condition, must be available at the location of the permitted equipment. Below is the permit condition language for your reference and to maintain compliance.

ANNUAL REPORTING CONDITION (REVISED):

Unless otherwise directed by SMAQMD, the permit holder must submit their applicable Annual Report to the District by March 15th of every calendar year. The Annual Report can be submitted online at www.AirQuality.org/AnnualReporting. SMAQMD may require the permit holder to supply additional information under the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.) and CARB's Criteria Pollutant and Toxics Emissions Reporting (California Code of Regulations, Title 17, Division 3, Chapter 1, Subchapter 7.7). If additional information is required, the SMAQMD will notify the permit holder.

[Basis: SMAQMD Rule 201, Section 303.1 & 405]
